What happens after a referral is made?

After a referral is made to the CT Dept. of Social Services, your case will be assigned to a transition coordinator located at either The Area Agency on Aging or a Center for independent Living. The Transition Coordinator will come out to meet with the individual interested in transitioning and develop a person centered transition plan with the consumer. A care planner from one of the Medicaid waivers may also be involved to help develop the care plan based on the services an individual might need. Assistance with locating housing is also available through a Housing Coordinator who is part of the transition team.

Want to support individuals who wish to return to the community to live independently? You can help by supporting the [Community Freedom Fund](#).
